The Protected By Allah

They Both Studied, and Allah Saw Them!
Two real-life stories

بِسْمِ اللَّهِ الرَّحْمَنِ الرَّحِيمِ

In The Name of Allah

They Both Studied, and Allah Saw Them!

Two real-life stories with
modification

By:

The Protected By Allah

Hassan flipped through the pages of the book anxiously.

A quarter of the night remains, and then the morning shines and the exam comes. He had only studied half of the required thick book.. Yesterday, he was busy helping his parents move to their new home, and he did not have enough time to complete his studies!

Time
is like a sword,
if you didn't cut it,
it will cut you!

Hassan whispered confused:

- The time has come before dawn; it is my habit to pray at night, but what about the exam? Praying or studying? I hope for **Allah** or I hope for success?

Finally, Hassan decided his matter and chose his **Lord**.

He jumped to his carpet and raised his hands to start his prayer saying: "**Allah** is Greater" .. Yes, greater than the world and its exams!

Allah-u
Akbar!

A prayer at
night is better than
the world and what
is in it !

Indeed, the time of the exam got close, and Hassan boarded the bus to go to the center with the book in his hand, and randomly turned the pages of the book ..and prayed:

- **Lord.. You** know my condition.. **You** know that I did not complete my studies because I was helping my parents.. Oh **Allah**, help me!

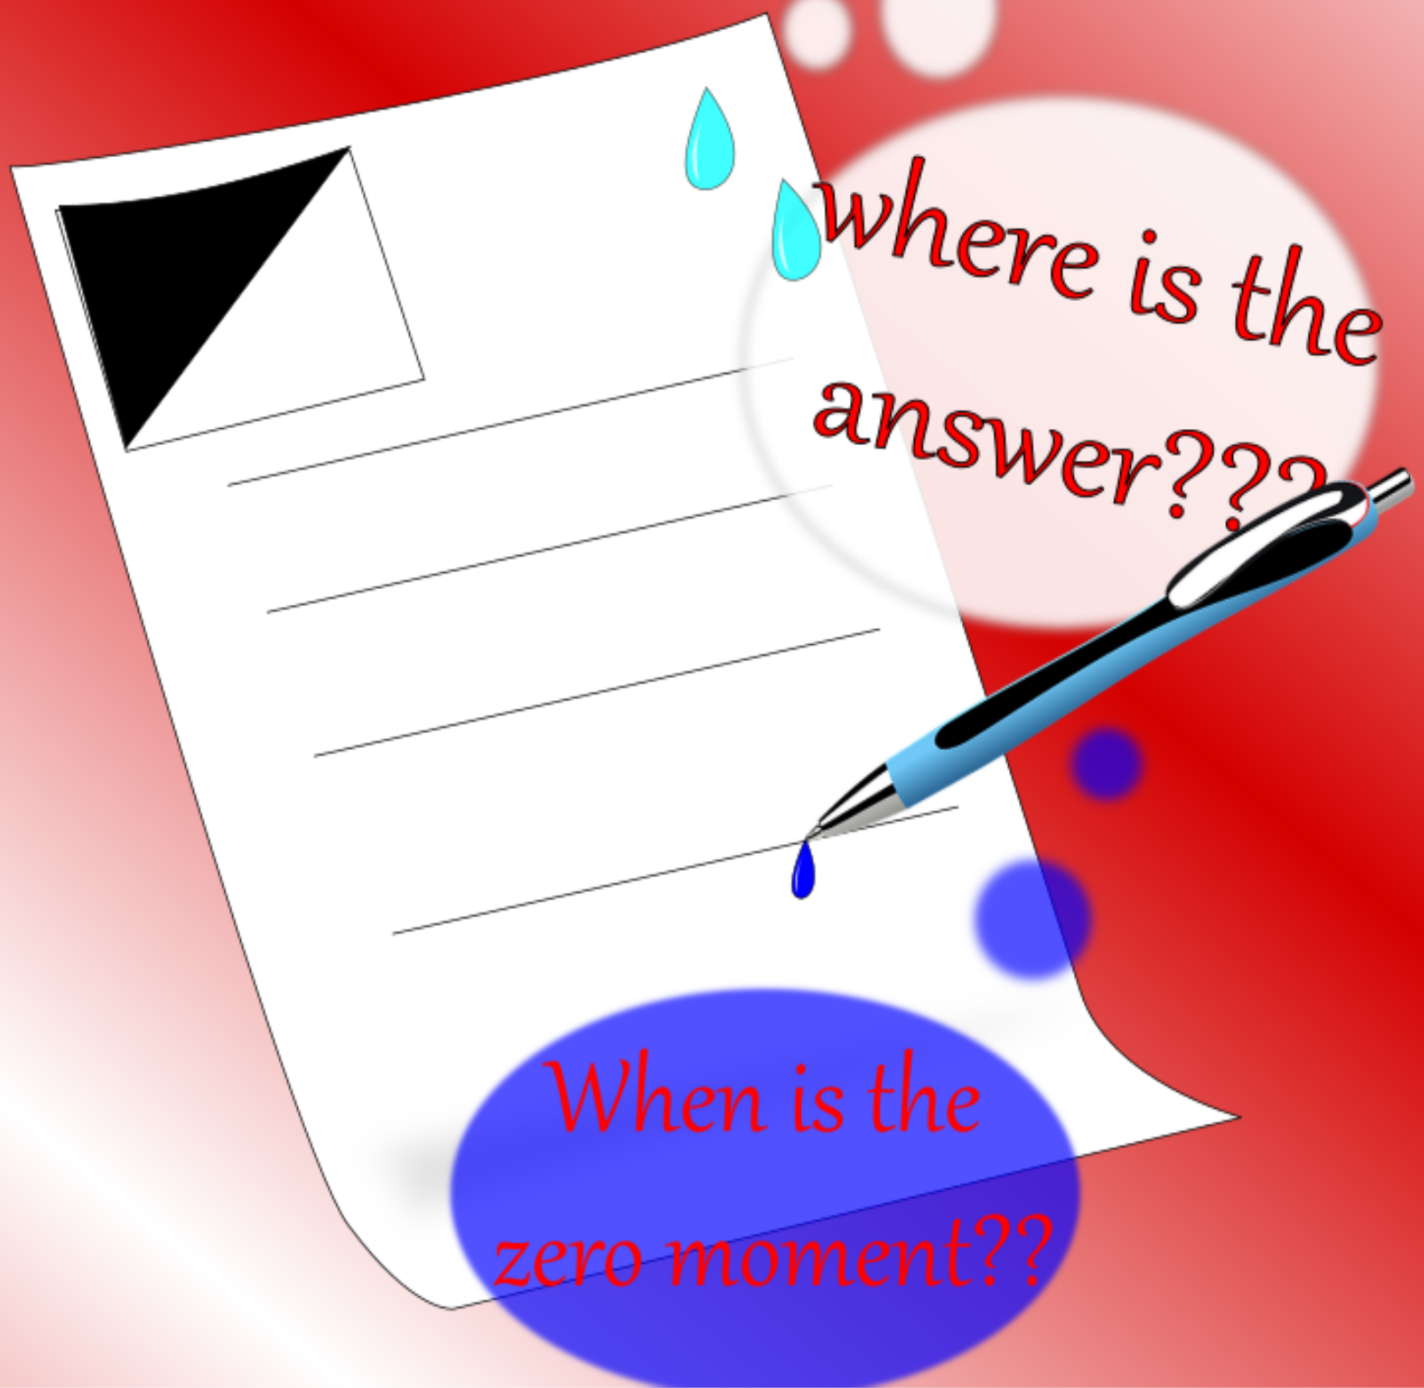

Then he studied the two mathematical questions that appeared to him first, but his heart was trembling!

My God!

I'll study any
mathematical
matter opens
first..

The bell rang, and the students entered the examination hall, and Hassan's heart was flapping! The paper is white waiting for the answer, and the blue pen has drooled waiting for the moment to pounce on the questions.. Oh my Lord!!.. Oh my Lord!!

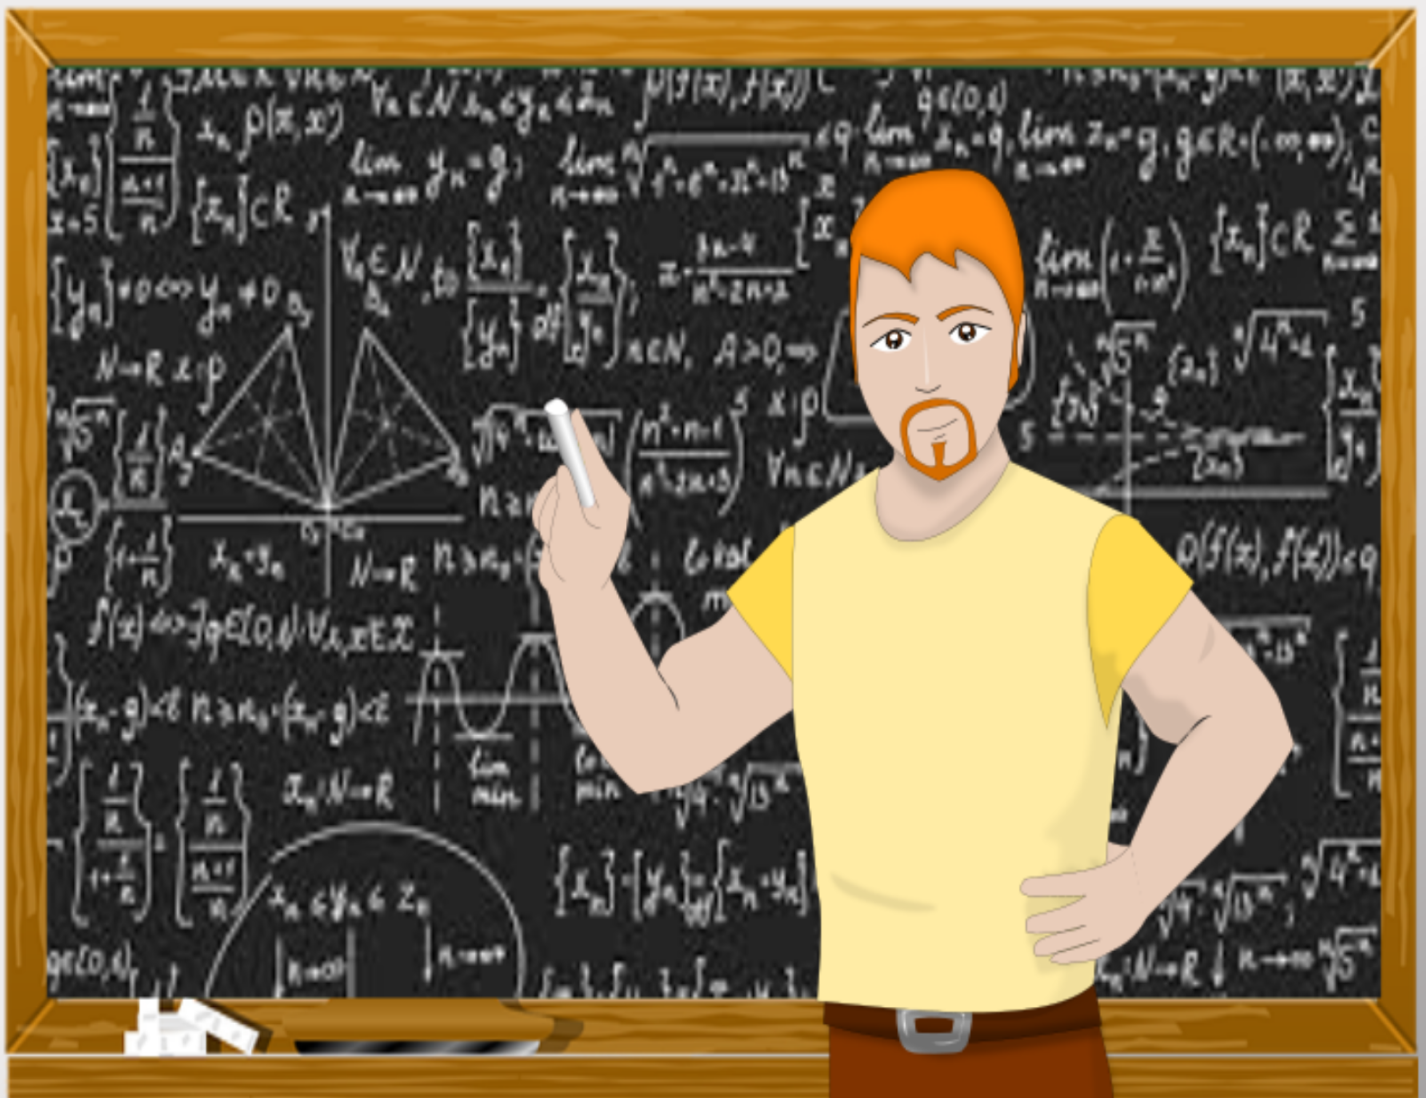

Suddenly Hassan started writing with a smile on his face, he could hardly believe his eyes; they are the only two questions that he studied randomly, but no! It was not randomly, it was with the appreciation of **The Affectionate** and **Appreciative**, Who saw Hassan's righteousness towards his parents and his sacrifice the night before, and so facilitated for him the success that seemed impossible, but **Allah Almighty** does not know the impossible, **He** is capable of everything !

(Indeed,
we used to call **Him** before
He is **The Righteous**,
The Most Merciful.)
Great truth of **Allah**!

I do not believe!..
There is nothing
in the exam that
I did not study!

...The End...

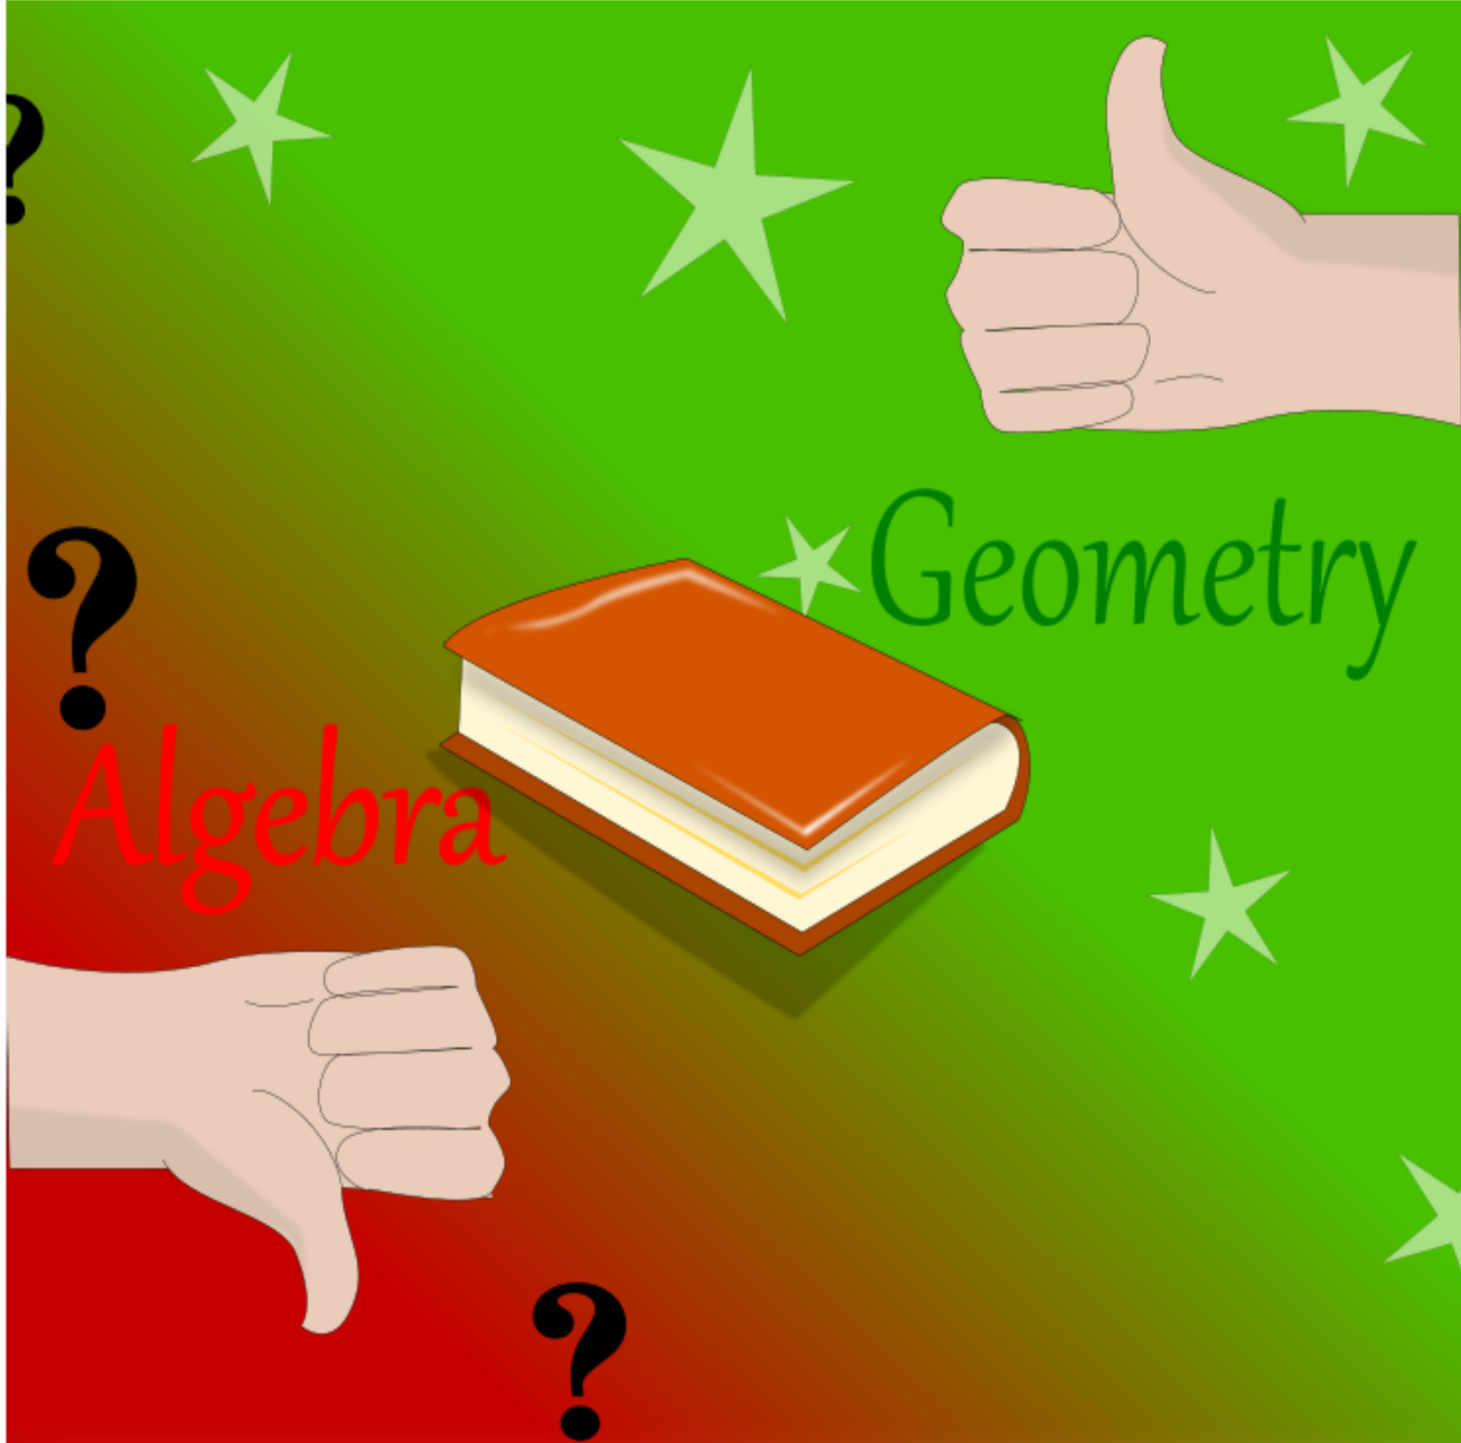

Amazing!

Genius!

Khaled is a strong and clever young man who loves to study and is proficient in Geometry. Everyone knows Khaled and his famous successes in solving difficult geometric matters.. Even his professor at the university is proud of him and always asks him to solve equalities in front of all students.. and he succeeds!

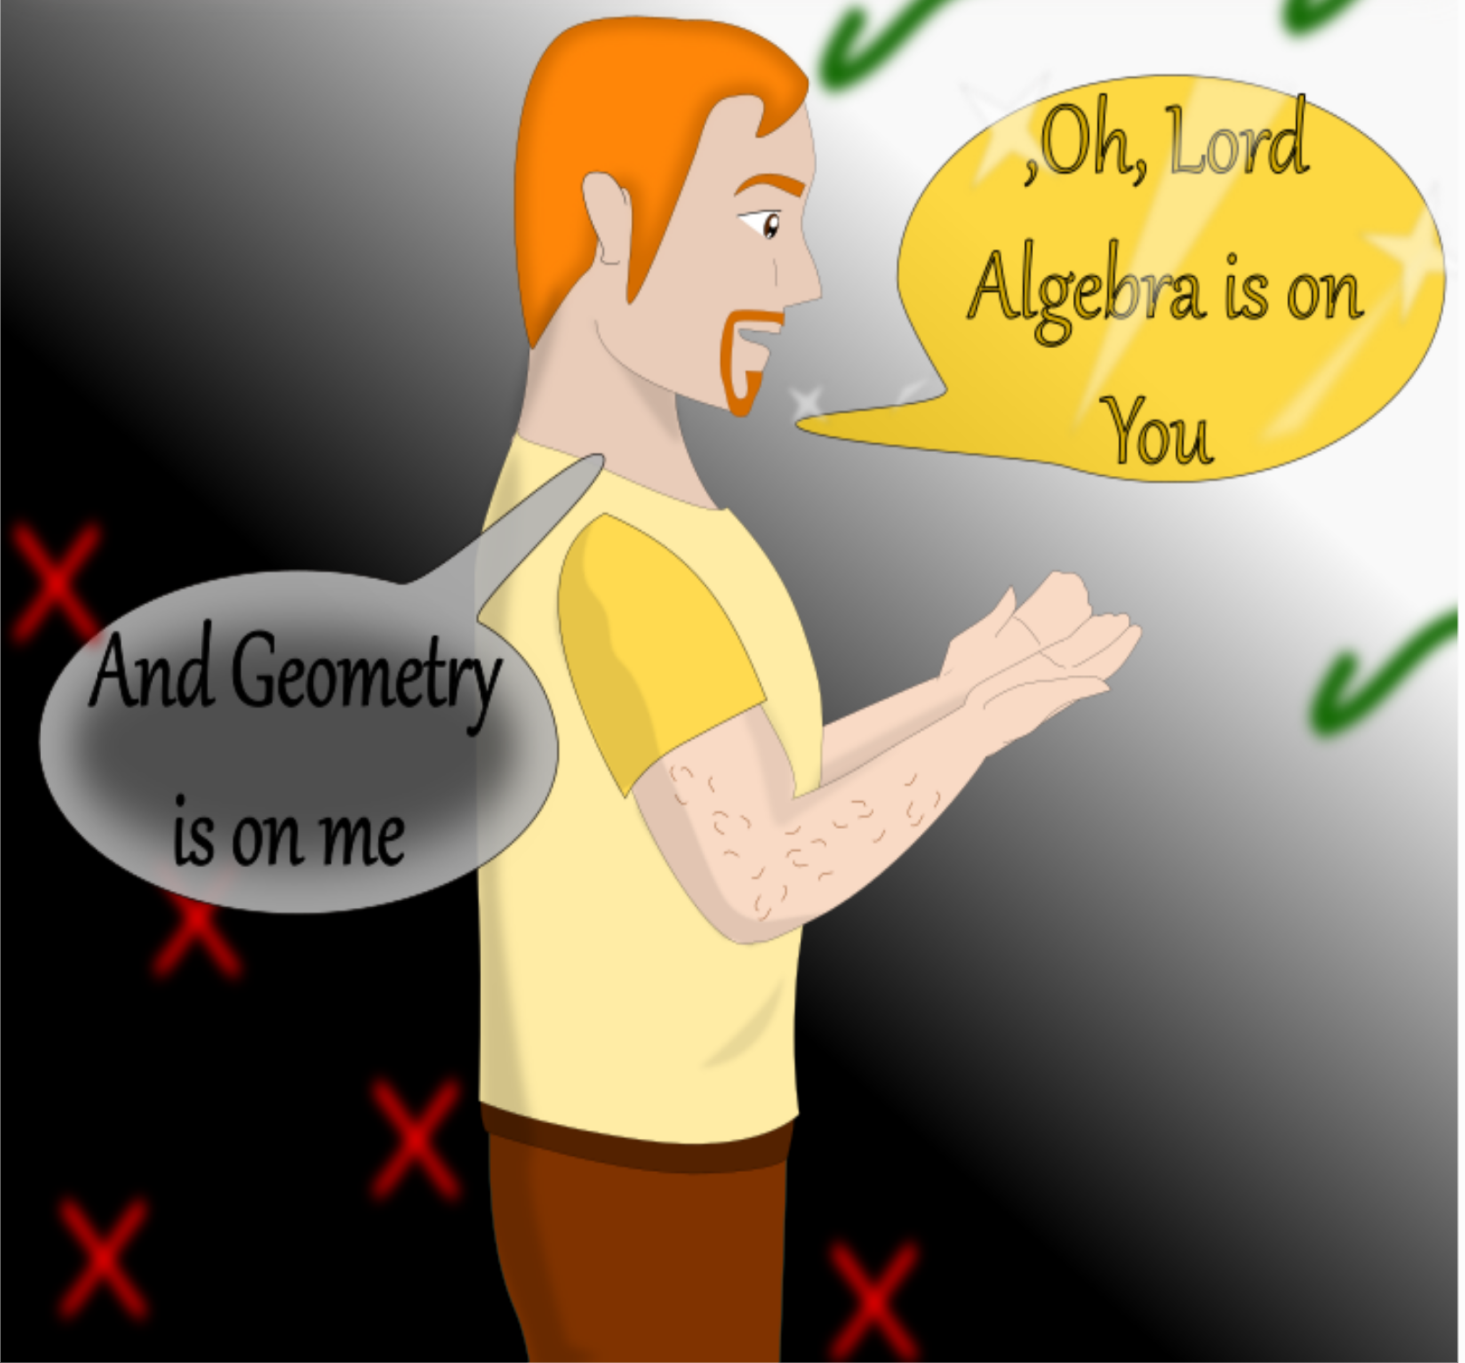

But the absolute perfection is only for **Allah**, Khaled is skilled in Geometry, but he needs concentration in Algebra.. he finds some difficulty, but he will overcome it, **Allah willing**.. He will study well, and **Allah** will grant him success!

The days passed, and the time for the exam came, so Khaled withdrew from the people to focus on his studies, so he prayed to **Allah**:

- Oh **Lord**, Algebra is on you, and Geometry is on me!

He saw and knew that he needed **Allah**'s help in Algebra subject because he was weak in it, so he prayed to **Allah** and spent the days studying it..

What are these books?!
.. what were they?

As for Geometry subject, he did not approach it at all,
and he thought that he would succeed in it straightaway,
everyone knows his genius in it!, so why did he pray to
Allah for an easy subject that he took for granted?!.. and
why did he study this subject while he is its champion?!

Indeed, **Allah** gave Khaled success in Algebra, but he succeeded in it after he put his trust in **Allah** and studied well, but what about Geometry?.. Here, **Allah** made the surprise not only for Khaled, but for all the students and the teacher as well!

Thank **God**
Who answered my
prayer and made
me successful in
Algebra!

How I love
these moments!

I must write a
difficult question for
such a genius!

This is the
Geometry hero!

I wish I was like him!

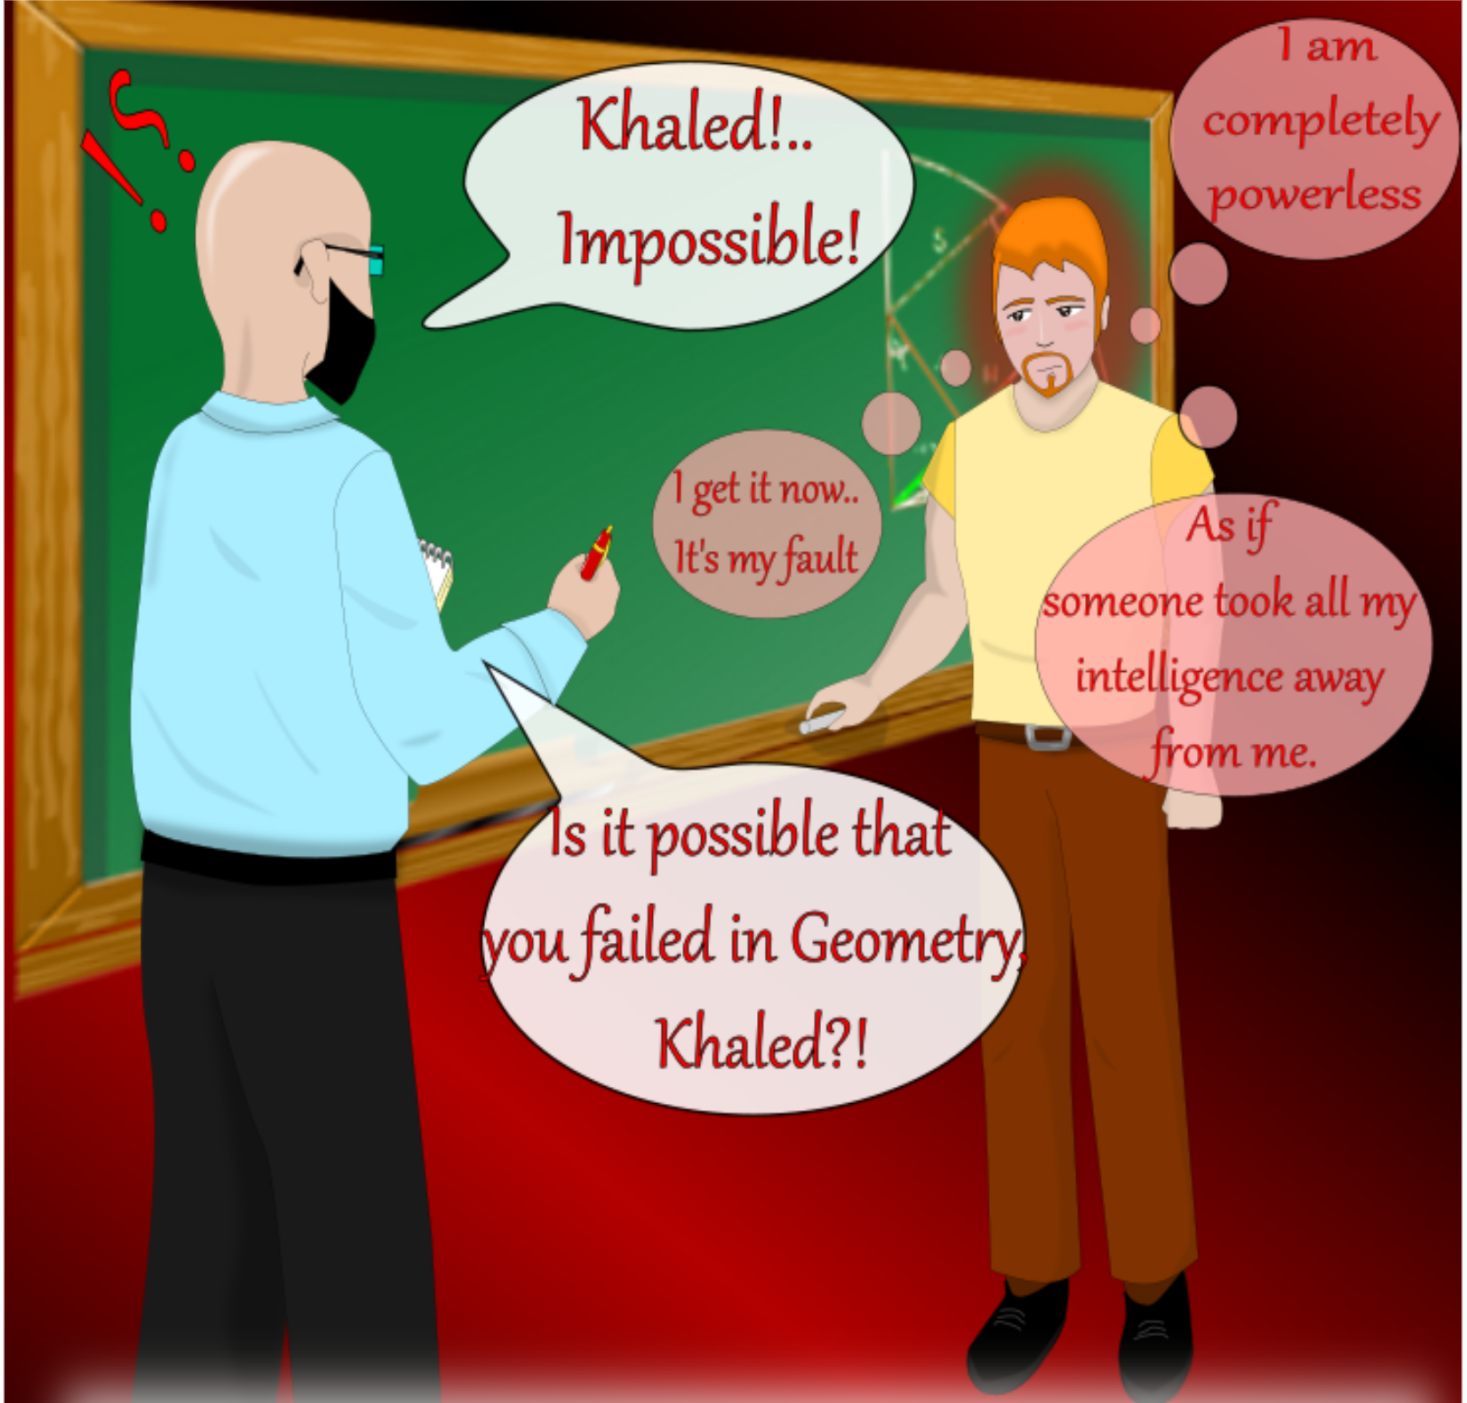

He'll solve it
in an instant!

No need to test
him at all!

Khaled stopped to answer the professor's question in the Geometry exam, and the professor intended to write a difficult question for the Geometry hero. The professor and the students got ready to watch the hero solve the question, but..

Khaled grabbed the chalk but could not find a single word to write. He tried, sharpened his mind, this is not the first time that he has solved questions, it is not the first time that he stand before all these students, but why?..why did not any word or any solution occur to him?!..Astonishment appeared on the face of the professor and the students whispered in astonishment: What happened to him?!.. Is he sick?!

Khaled's face turned red and he was sweating! The professor gave him a second and a third question, saying:

- Khaled! What happened to you?!.. Unbelievable!

But there is no result.. Khaled did not know a word and was unable to solve any equality, and he failed the exam that was his hero, and all eyes stared at him as he melted with shame!

Did you know the reason, my friends?!.. **This is true**;
Khaled did not rely upon **Allah** in the Geometry
subject, instead he arrogantly said:

'Geometry is on me', he forgot that **Allah** is who
gave him the talent of Geometry, and if **He** willed,
He would take it from him as happened, but after
that, Khaled repented and started relying upon
Allah, studying and supplicating:

- Oh **Lord**, Algebra and Geometry are upon **You**;
Grant me success with **Your** power, O **He** who
has power over all things !

Lord..
Geometry and Algebra
are upon You!

O Allah..
I repent to You!

O Allah..
I - without you -
nothing!

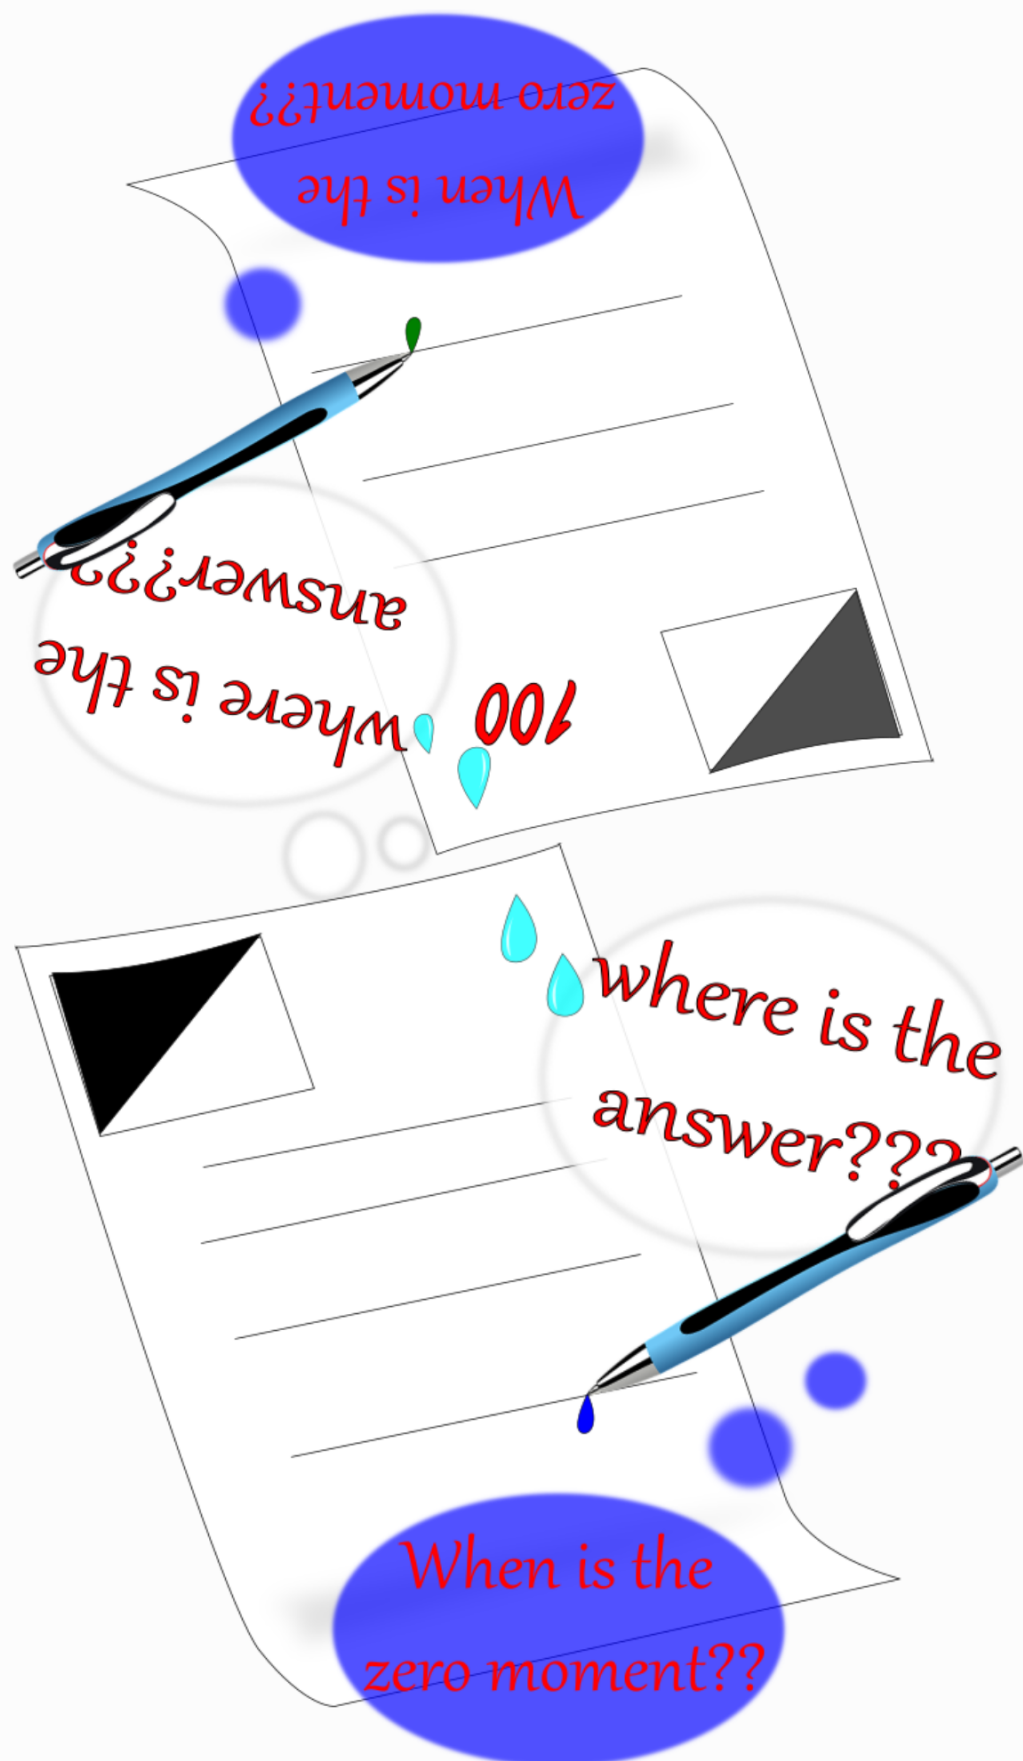

Oh my God..
Do not entrust me
to myself, not even
for a blink of
an eye!

...The End...

...Done By the Grace of Allah...

Can you find out the five differences between the two drawings?

Can you determine the right path that Khaled is taking to prosper?
